

Testudo3D

VIDEO

add-on that adds tiling functionality to Blender.

Features:

- grab, copy and paste regions of tiles
- fast mouse controls or precise keyboard controls
- auto-tiling
- use multiple 'roots' and transform them to break repetition
- Blender's layers work perfectly to manage detailed scenes
- auto-generate tilesets from just a wall, floor and ceiling mesh
- implements [turtle graphics](#)! (hence the name)

see [wiki.md](#) for more info
